I. INTRODUCTION

The 1998 American Fisheries Act (AFA) allowed for the rationalization of the Bering Sea Pollock fishery by providing an avenue for the creation of cooperatives, and thus the Unalaska Fleet Cooperative (UFC). The cooperative structure serves to eliminate the 'race for fish' and promote efficiency, economic stability, and safety for participants. The Unalaska Fleet Cooperative was formed in December of 1999 with the objective of creating flexible fishing strategies to reduce bycatch and maximize the utilization of all species in a fishery.

In compliance with AFA regulations, the Unalaska Fleet Cooperative submits this report as a summary of harvest and performance for the 2021 fishing season.

Catch figures are compiled from the best available source, either actual fish ticket information or extrapolations from NMFS observer data, and are included in sections III (AFA Pollock) and IV (Sideboards) in both the Bering Sea and Gulf of Alaska. Included under Section III are tables which list the distribution and catch of AFA Pollock and prohibited species catch (PSC) on a vessel by vessel basis as well as any associated contract fishing and transfer schedules. Section IV of this report lists sideboard allocations for the Bering Sea and Gulf of Alaska. The included tables show directed fishery participation and associated PSC on a per vessel basis as well as aggregate groundfish bycatch.

II. UNALASKA FLEET COOPERATIVE

A. Membership

In accordance with the American Fisheries Act section 2 (10)(b), management representing nine catcher vessels signed the Unalaska Fleet Cooperative Membership Agreement (Exhibit 1) (Attachment 1) in association with Alyeska Seafoods Inc. for the 2021 fishing year. In turn, vessels receive a specific allocation of pollock in the Bering Sea and Aleutian Islands according to their historical catch in 1995, 1996, and 1997 as published in 50 CFR 679 Table 47C. Through improved fleet monitoring, pooling of resources, and use of the latest technology, co-op members strive to reduce bycatch and increase target species utilization, thereby allowing for a safer and more efficient operations.

* The F/V Morning Star vessel name changed to the F/V Northern Defender in 2018. It will be referred to as the F/V Northern Defender for the remainder of this report.

B. Co-op Management

The Co-op contracted a manager to assist in the implementation of fishing strategies which maximize resource utilization, bycatch reduction, and promote safety within the fishery. The manager relayed information between member vessels and Alyeska Seafoods Inc. regarding allocations, transfers, pollock catches, sideboard catches, and PSC. The manager distributed pollock allocations using vessel inshore percentages as published by NMFS and set seasonal and area caps to meet NMFS regulations for Stellar Sea Lions.

In an effort to reduce salmon bycatch, member vessels participated in both the Salmon Savings Incentive Plan Agreement (SSIP) and the Rolling Hotspot Closure System within the Intercooperative Agreement (ICA). The co-op manager facilitated compliance with the guidelines set forth in these programs by providing the fleet with the most up to date information made available from our own records and fleet wide data from Sea State Inc. Please refer to section V of this report for further information on member vessel compliance within each of these programs.

As part of our goal for improved utilization, the co-op manager filed transfer agreements between members within the co-op, as well as Amendment 69 contract fishing documents for harvest by members outside of our co-op. The F/V Alaskan Defender, F/V Pacific Prince, and F/V Pacific Challenger contracted with UFC and delivered a total of 2,776 MT of Pollock from the BSAI during 2021. No UFC members were contracted to deliver outside of the coop for 2021. All Pollock landings during the 2021 fishing season were made within the state of Alaska.

III. AFA Pollock

A. Allocation of Bering Sea Pollock

The total 2021 TAC for Pollock was set at 1,394,000 MT, of which 1,375,000 MT was allocated to the Bering Sea and 19,000 MT to the Aleutian Islands. There was a subsequent rollover of 12,600 MT from the Aleutian Islands to the Bering Sea in 2021. The Incidental Catch Allowance (ICA) of 4.0% was calculated after subtracting the CDQ DFA of 10% from the TAC. The remainder is then divided among the AFA inshore, offshore, and mothership fleets (Exhibit 2).

EXHIBIT 2. 2021 Allocation of Pollock TAC to Directed Pollock Fisheries and CDQ Directed Fishing Allowances (MT) in the Bering Sea

TAC	1,375,000
CDQ	137,500
INCIDENTAL CATCH ALLOWANCE (ICA)	49,500
* OFFSHORE – 40%	475,200
* MOTHERSHIP – 10%	118,800
*INSHORE – 50%	594,000

* Amounts calculated after deductions for CDQ and ICA. A rollover from the AI occurred in the A season for 12,600 mt.

TAC and directed fisheries allowances are as listed at:

B. Allocation of Bering Sea Pollock to the Inshore Cooperatives

Seven cooperatives comprised the inshore sector in 2021. There were no vessels participating in Open Access this year. The allocation to each cooperative is based on the sum of each of its member's individual allocations, which was based upon catch from the best two of three years 1995-1997.

EXHIBIT 3. Percent Distribution of Inshore Pollock Allocation between the seven inshore AFA Pollock Cooperatives

*Includes 12,600 mt reallocation from the Aleutian Islands to the Bering Sea.

C. UFC Member Vessel Initial Pollock Allocations

Vessels in the cooperative received initial allocations based on their catch histories in the best two of three years in 1995-1997. UFC member vessels initial allocation of AFA Pollock totaled 68,756 MT. Allocations are expressed as percentage of the inshore AFA CV fleet, percentage within the co-op, and in tonnage.

D.UFC Intra Cooperative Transfers, Contract Fishing, and Harvest of Directed Pollock

Transfer agreements were negotiated among members of the co-op to increase efficiency and maximize resource utilization. The co-op manager was responsible for filing these transfers with Intra cooperative Manager, in addition to preparing documents outlining the transfer. The F/V Messiah did not participate in the directed Pollock fishery during 2021 and transferred nearly all of their allocation to other member vessels. The coop contracted the F/V Alaskan Defender, F/V Pacific Prince, and F/V Pacific Challenger to harvest 2,776 MT of pollock in 2021 (Exhibit 5)(Exhibit 6). All landings were made within the state of Alaska.

*Quotas were managed in pounds to facilitate the reconciliation of numbers with fish ticket information. Differences are due to rounding errors in repeated conversion of weights from pounds to metric tons and back.

E. UFC AFA Directed Pollock Fishery Catch and Bycatch

Using the most up to date bycatch information from Sea State Inc., as well as historic migration patterns of both PSC and pollock, the co-op manager worked with member vessels and Alyeska Seafoods Inc. to develop a fishing plan that helped achieve their goals for the 2021 fishing season.

UFC directed Pollock catch for 2021 totaled 68,696 MT (Exhibit 6)(Exhibit 7). UFC Pollock deliveries represented 99.91% of their allocation. All deliveries were landed in the state of Alaska.

With the passage of Amendment 84 (the salmon bycatch ICA), salmon avoidance was made a priority by establishing additional reporting requirements and promoting vessel-level accountability. UFC members have participated in both the SSIP and Chum RHS agreements, which use fleet wide catch data to advise vessels of high salmon bycatch areas. In 2020 these agreements were combined into a singular salmon bycatch avoidance plan. As required by the SSIP, all members of the co-op use salmon excluders and follow protocols to promote salmon escapement. The revised SSIP does not include a 'Dirty 20' list and will no longer be included in this report. No members of our co-op were in violation of salmon closures and Exhibit 8 reflects UFC salmon bycatch in 2021. Further information regarding the effectiveness of these programs will be made available in the Inshore Salmon Savings Incentive Plan Agreement annual report.

IV. Sideboard Limits, Allocations, and Catch

In response to the laws of the AFA, the North Pacific Fisheries Management Council established sideboard species caps for the GOA and BSAI, which restricted harvest by AFA catcher vessels to historic levels with a few exceptions. Vessels would be exempt from the BSAI Pacific Cod sideboard limit (BSAI Cod-exempt) if they met the following: less than 125' LOA, with more than 30 deliveries of BSAI P. cod, and less than 1,700 MT of BSAI Pollock landed during 1995-1997. In addition, vessels could be exempt from GOA sideboard limits (Gulf-exempt) if they met the following: less than 125' LOA, with more than 40 deliveries of GOA groundfish, and less than 1,700 MT of BSAI Pollock during 1995-1997. Sideboard caps are issued as an aggregate for all AFA catcher vessels and are further allocated to individual cooperatives within the Intercooperative Agreement (ICA). The AFA requires that all sideboard species harvested, whether target catch or bycatch, be accounted for and reported in final harvest specifications.

UFC members exhibited a wide range of fishery participation during the qualifying years for sideboard allocations and their status can be found in Exhibit 1. Participation in the BSAI directed Pacific Cod sideboard fishery by dually qualified vessels (F/V Vanguard and F/V Western Dawn) is represented in the annual report of the Mothership Fleet Cooperative.

A. BSAI Sideboard Limits, Intercooperative Transfers, and Directed Catch

According to regulation, directed fishing of sideboard species in the BSAI is prohibited except for Pacific Cod and Yellowfin sole. Only Pacific Cod was further allocated to UFC in 2021 for a total of 1,525 MT. In 2021, 250 MT of Pacific Cod was transferred to the Westward Fleet Coop per the Intercooperative manager and agreement (Exhibit 9). The F/V Northern Defender was the only UFC member to participate in the directed Pacific Cod fishery for 2021 and they harvested a total of 339.80 MT (Exhibit 10) (Exhibit 11). UFC BSAI sideboard limits, Intercooperative transfers, and aggregate catch are further broken down in (Exhibit 12). A voluntary Catch Share Program was implemented in the BSAI Pacific Cod CV trawl fishery for A and B season, with final vessel allocations equaling 354.48 MT (Exhibit 10).

** As of 2020 AFA CV Sideboard limits are no longer posted due to the small amounts and no directed fishery. As a result only P. Cod and PSC limits are posted, they are available under Table 22 at <https://www.federalregister.gov/documents/2021/03/09/2021-04475/fisheries-of-the-exclusive-economic-zone-off-alaska-bering-sea-and-aleutian-islands-final-2021-and>

B. GOA Sideboard Limits, Intercooperative Transfers, and Directed Catch

UFC members have historical participation in the Gulf of Alaska fisheries and continue to participate in the Central region. A total of 620 MT of sideboards from two cooperatives were transferred to UFC in 2021 (Exhibit 13). There were no transfers from the Unalaska Fleet Cooperative in 2021. Initial sideboard limits for the Unalaska Fleet Cooperative totaled 4,247 MT (Exhibit 14). In addition to Intercooperative sideboard transfers, allocations remaining at the end of each season in the Pollock and Pacific Cod fisheries are ‘rolled over’ into the subsequent season and thus accumulate throughout the year. Final sideboard allocations include the initial allocation, transfers, and any rollovers from the prior season.

The F/V Vanguard made landings in the GOA Pollock (Exhibit 15), GOA Pacific cod (Exhibit 16), and shallow water flatfish (Exhibit 18) directed fisheries. There were no landings in the Arrowtooth (Exhibit 17) or Rex Sole (Exhibit 19) directed fisheries in 2021. Values represented in Exhibits 14-19 represent harvest in a directed fishery only and are derived from actual fish tickets. The F/V Vanguard landed 1,454 MT of aggregate sideboard catch and 1.23 MT of discards in the GOA during 2021 (Exhibit 20). The vessel discards accounted for 0.08% of their aggregate sideboard catch and bycatch at sea.

* GOA Pollock and Pacific Cod sideboard allocations are issued on a seasonal basis. Any remaining allocation at the end of the season rolls over into the subsequent season if an opening is announced. Catch within a particular season may exceed the allocation for that season, provided there is sufficient 'rollover' allocation to account for the difference.

** The catch values included in the table were incurred in a Directed fishery and do not include bycatch values
