Section 1 – Introduction	Pg. 3
1.1 Purpose of the Catcher Vessel Intercooperative Report	Pg. 3
1.2 The 2024 Catcher Vessel Intercooperative Agreement	Pg. 3
1.3 AFA Pollock and BSAI/GOA Sideboard Enforcement	Pg. 4
Section 2 - Bering Sea Pollock Fishery	Pg. 4
2.1 Allocations and Harvest	Pg. 4
2.2 Pollock Fishery Salmon Bycatch Reduction	Pg. 6
Section 3 - Sideboard Fishery Management	Pg. 8
3.1 Groundfish Sideboards	Pg. 9
3.2 PSC Catch	Pg. 12
Appendix I - 2024 Catcher Vessel Intercoop Agreement	Pg. 14

## Section 1. Introduction

### 1.1 Purpose of the Catcher Vessel Intercooperative Report

The AFA Catcher Vessel Intercooperative Report is a summary of the seven active catcher vessel cooperative reports required by the American Fisheries Act (AFA) regulations. While the required individual coop reports track the annual activities of each cooperative at the vessel level, a summary of AFA catcher vessel harvests in the Bering Sea and Gulf of Alaska fisheries is useful because NMFS allocates the catcher vessel sideboard caps and PSC caps & triggers in the aggregate, not by individual cooperatives. The Catcher Vessel Intercooperative Report provides the North Pacific Fisheries Management Council and the public with a simpler means of evaluating the AFA catcher vessel fleets' aggregate fishing performance under the AFA regulations. Additionally, this report provides information beyond the required regulatory elements of the individual coop reports to provide a broader understanding of catcher vessel cooperative activities.

### 1.2 The 2024 Catcher Vessel Intercooperative Agreement

The AFA catcher vessel cooperatives rewrote portions of the Intercooperative Agreement in 2023 for the 2024 AFA CV Intercooperative Agreement. The 2024 rewrite focused mainly on changes due to implementation of the PCTC program. Changes to the Agreement included:

- 1) Changes to the AFA BSAI Pacific cod sideboard limits.
  - a. removal of AFA BSAI Pacific cod sideboards for the annual PCTC “A” and “B” seasons but retained AFA BSAI Pacific cod sideboards for the annual “C” season.
- 2) Changes to the halibut and crab PSC limits for the BSAI Pacific cod trawl CV sector.
  - a. removal of the AFA halibut PSC sideboards for AFA vessels in the annual PCTC “A” and “B” seasons.
  - b. retain the AFA crab and halibut PSC sideboards for the annual BSAI Pacific cod “C” season.
- 3) Revisions to the better practices protocols that promote halibut bycatch reduction so that they remain applicable to the annual BSAI Pacific cod “C” season.

The 2024 Agreement continues to emphasize the commitment by all members towards reducing bycatch in each Bering Sea and Gulf of Alaska groundfish fishery in which they participate.

Primary elements of the Intercoop Agreement:

- 1) Allocation, monitoring, and compliance of the A and B season pollock fishery splits for the inshore CV cooperatives.
- 2) Allocation, monitoring, and compliance of the BSAI and GOA sideboard limits and PSC limits for the AFA catcher vessel cooperatives.
- 3) Allocation, monitoring, and compliance of BSAI pollock harvest inside the Steller sea lion conservation area (SCA) for the inshore CV cooperatives.
- 4) Establishment of penalties for coops that exceed pollock and sideboard allocations.
- 5) Provides for the harvest of BSAI pacific cod by the “under 1700 mt” exempt vessels while complying with PSC limits.
- 6) Management and monitoring of sideboard species transfers between cooperatives.
- 7) Promotes compliance with the Council’s recommended sideboard measures and PSC limits while allowing for the maximum harvest of AFA pollock and sideboard allocations.
- 8) Promotes reduction of prohibited species catch (PSC) in the Bering Sea pollock fishery.

The 2024 AFA Catcher Vessel Intercooperative Agreement is available in Appendix I.

### 1.3 AFA Pollock and BSAI/GOA Sideboard Enforcement Actions

No coop enforcement or penalty actions regarding the over-harvest of AFA pollock, directly fished BSAI sideboard fishery limits, directly fished GOA sideboard limits, and BSAI & GOA PSC limits occurred in 2024.

## Section 2. Bering Sea Pollock Fishery

### 2.1 Pollock Allocations and Harvest

There was a total of 93 AFA qualified catcher vessels for the 2024 fishing year. The inshore sector started the year with 76 qualified vessels of which all were members of the 5 active inshore cooperatives in 2024.

The mothership catcher vessel sector has a total of 19 qualified catcher vessels; all are members of the Mothership Fleet Cooperative. Thirteen (13) are “dual qualified” for both the mothership and inshore sector pollock fisheries.

Four (4) catcher vessels are qualified for the catcher processor sector and make up the High Seas Catchers’ Cooperative. In 2023 the FV Ocean Harvester was replaced by the FV Muir Milach, resulting in four remaining HSCC vessels.

The following Table 2.1 provides information on: 1) the number of members in each catcher vessel cooperative, 2) each coop's pollock allocation percentage, 3) annual coop allocations, 4) total directed pollock harvest, and 5) the amount of pollock harvest under the annual allocation.

**Table 2.1**

Source: Annual Catcher Vessel Coop Reports & NMFS

<b>2024 AFA CATCHER VESSEL COOPERATIVES' POLLOCK ALLOCATIONS AND DIRECTED FISHING HARVESTS</b>					
<b>Cooperative</b>	<b>Number of Vessels in Coop</b>	<b>Annual Allocation Percentage</b>	<b>Annual Allocation in Metric Tons (w/ AI Rollover)</b>	<b>Harvest in Metric Tons</b>	<b>Over / (Under) Allocation</b>
<b>INSHORE CATCHER VESSEL COOPERATIVES</b>					
Akutan Catcher Vessel Assoc.	34	33.788%	191,185	191,004	(181)
Northern Victor Fleet Cooperative	14	9.346%	52,881	52,847	(35)
Unalaska Fleet Cooperative	7	12.261%	69,380	69,362	(17)
Unisea Fleet Cooperative	13	23.123%	130,836	130,766	(71)
Westward Fleet Cooperative	8	19.380%	109,658	109,634	(24)
Inshore Totals*	76	97.897%	553,940	553,613	(327)
<b>OFFSHORE CATCHER VESSEL COOPERATIVES</b>					
Mothership Fleet Cooperative	19	10% of DFA	113,168	111,766	(1,402)
High Seas Catchers Cooperative	4	3.4% of DFA	38,477	Details of the HSCC pollock harvest are covered in the joint PCC and HSCC Report	

\* 2024 Inshore AFA Coop totals do not include the AFA Inshore Open Access.

The vessel counts in the Northern Victor, Unisea, and Unalaska coops changed from 2023 to 2024. The Peter Pan coop is no longer active and the vessels from the 2023 Peter Pan Coop entered into the AFA Inshore Open Access. Within the Northern Victor coop the FV Commodore was removed and entered into the Unalaska Coop. Additionally the FV Pacific Challenger was removed from the Northern Victor Coop and entered into Open Access. Within the Unalaska Coop, the FV Western Dawn and FV Vanguard were removed and entered into the Open Access. Within the Unisea Coop, the FV Arctic Wind entered after leaving the Open Access. The from the 2023 Peter Pan coop that entered the Open Access are the FV Elizabeth F, FV Walter N, FV American Beauty, FV Ocean Leader, FV Oceanic, FV Topaz. The FV Providian was removed from the 2023 Peter Pan Coop, entered the Open Access, but was replaced by the FV American Beauty.

No AFA catcher vessel coops exceeded their annual pollock allocations in 2024 or landed any pollock outside the State of Alaska.

## 2.2 Pollock Fishery Salmon Bycatch Reduction Measures

### 1. Amendment 91 and 110 Incentive Plan Agreements - IPAs

Beginning in 2011 regulations for reducing Chinook bycatch in the Bering Sea pollock fisheries were implemented under Amendment 91. For the first time a Prohibited Species Catch (PSC) limit for the incidental catch of Chinook salmon by pollock fishers was put in place. On a sector basis, exceeding the sector's limit (hard cap) will close directed pollock fishing by the sector. Under the provisions of Amendment 91 there are three levels of hard caps based on a vessel's willingness to participate in an Incentive Plan Agreement (IPA). The general intent of an IPA is to reduce Chinook bycatch at all levels of abundance encountered by a fishing vessel as opposed to a traditional hard cap management approach that only alters fishing behavior when there is a danger of reaching the hard cap.

Under A91, vessels and/or CDQ groups opting to participate in an IPA would be allotted their portion of a 60,000 Chinook limit. If no vessels or CDQ Groups chose to participate in an IPA each pollock sector would receive its share of a 47,591 hard cap. Vessels and/or CDQ Groups opting out of participating in an IPA when other vessels and/or CDQ had chosen to participate in an IPA would operate under a hard cap based on those vessels share of a 28,496 Chinook limit. Three IPAs formed under A-91; the Inshore Salmon Savings Incentive Plan, the Mothership Salmon Savings Incentive Plan, and the Chinook and Chum Salmon Bycatch Reduction Incentive Plan.

The regulatory conditions of Amendment 91 do not dictate what specific types of incentives an acceptable IPA must include, but rather the outcome the incentives chosen by an IPA group must provide. Pollock fleets must submit, for approval by NMFS, an IPA that meets the following criteria:

- Provide incentives at the individual vessel level
- Incentivize vessels to avoid Chinook bycatch at all levels of abundance in all years
- Reward vessels that successfully avoid Chinook and/or penalize vessels that fail to avoid Chinook
- Incentives must influence fishing decisions at levels below the hard cap
- Keep bycatch below the performance standard of 47,591 in most years
- The IPA must describe how the IPA ensures each vessel will manage their bycatch to keep total bycatch below the sector level regulatory performance standard

Amendment 110, passed by the Council at its June 2014 meeting and initiated for the 2017 fishing year, included bycatch reduction measures for non-Chinook salmon (primarily chum salmon) into the existing IPAs. Amendment 110 also includes a reduction of the Chinook salmon hard cap and performance standard when a three-river index for Chinook returns to the Kuskokwim, upper Yukon, and Unalakleet rivers that are less than 250,000 Chinook salmon. When the index falls below 250,000, the hard cap is reduced to 45,000 bycaught Chinook and the performance standard is reduced to 33,318 for the following year.

In October of 2023 the Alaska Department of Fish and Game notified the North Pacific Fishery Management Council that the three-river index fell below the 250,000 fish level. Consequently the 2024 Chinook salmon bycatch limit for the entire pollock fishery was set at 45,000 fish and the performance standard was set at 33,318.

Amendment 110 included requirements for an industry-wide data sharing agreement, use of salmon excluders, inclusion of a rolling hot spot (RHS) program for both Chinook and chum salmon, a maximum 3 year lifespan for Savings Credits in savings based IPAs, restrictions on October pollock fishing that will prevent Chinook bycatch rates from becoming significantly higher than rates experienced in preceding months, and name a “third party” that will receive RHS closure area reports along with any RHS closure area violations. Amendment 110 also added more explicit annual reporting requirements for the IPAs.

Each IPA is required to submit an annual report to the Council by March 15<sup>th</sup> of the following year under a set of reporting requirements provided in the Amendment 110 regulations. The following Table 2.2 provides the salmon bycatch by AFA catcher vessels in each IPA.

**Table 2.2**

Source: Annual IPA and Coop Reports

<b>2024 AFA Catcher Vessel Salmon Bycatch in Pollock*</b>		
IPA Group	Chinook Bycatch	Chum Bycatch
	(# of salmon)	
Inshore Salmon Savings Incentive Plan (ISSIP)**	3,876	21,927
Mothership Salmon Savings Incentive Plan (MSSIP)	528	4,438
Chinook Salmon Bycatch Reduction Plan and Agreement (HSCC only)	0	0
	(No HSCC vessels fishing BS pollock in 2024)	

\* No Dirty 20 list

\*\* AFA Inshore Open Access vessels are ISSIP members therefore Open Access salmon bycatch is included.

The AFA reporting regulations require coops to report the number of times they appear on a salmon bycatch “Dirty 20 List”. However, the “Dirty 20 List” was dropped from salmon reporting requirements under the IPAs. Therefore, no coops have reported ‘Dirty 20 List’ appearances for 2024 in their annual reports.

### Section 3. Sideboard Fishery Management

The American Fisheries Act directed the North Pacific Fisheries Management Council (NPFMC) to provide regulations aimed at protecting non-AFA vessels participating in other groundfish and crab fisheries from adverse impacts that may occur due to the rationalization of Bering Sea pollock fishery. This mandate brought about the implementation of groundfish, crab, and prohibited species catch (PSC) sideboard limits by the NPFMC for the AFA fleet. Catcher vessels with less than 1,700 mt of historic catch in the BSAI pollock fishery and meet minimum landing requirements in either the BSAI and/or GOA are granted exemptions to the BSAI cod fishery sideboard and/or GOA groundfish and PSC sideboards. All catcher vessels in the Mothership cooperative become exempt to BSAI cod sideboard limits after March 1. Note that exemptions to BSAI cod sideboards only apply to the directed cod fishery in C season; all AFA BSAI cod catcher vessels participating in the C season are subject to the PSC sideboard limits associated with the fishery. Due to the implementation in 2024, A and B season directed cod fishing is managed under the PCTC program. The C season is not included in the PCTC program.

NMFS limits the non-exempt AFA catcher vessel fishing in the BSAI and GOA by an aggregate sideboard cap for each groundfish species category, and an associated PSC bycatch limits. In turn, the AFA Catcher Vessel Intercooperative Agreement provides for coop specific

sideboard limit distribution, and re-distribution via intercoop transfers, of the aggregate sideboard caps and associated PSC among eight catcher vessel coops (including Open Access) based on their members catch history. BSAI cod exempt vessels must meet PSC bycatch standards or face losing their exempt status (see section 3.a. and 3.b. of the Catcher Vessel Intercoop Agreement in Appendix 1.)

Beginning in 2020, the Council closed numerous BSAI species to directed fishing by the AFA catcher vessels. And then in 2024 with the implementation of the PCTC program, the BSAI cod sideboards were reduced further. Now the BSAI Pacific cod fishery C season is the only sideboarded fishery open in the BSAI area to the AFA catcher vessel fleet.

Yellowfin sole fishing is open to the BSAI catcher vessels without a directed fishery sideboard limit.

### 3.1 Groundfish Sideboard Harvest

The following tables provide aggregate information regarding the allocation and directed harvest of BSAI and GOA sideboard species by AFA non-exempt catcher vessels.

Table 3.1a would cover the initial cod sideboard limits, inter-cooperative transfers of those limits, and each coops' non-exempt vessels' harvest in the BSAI cod fishery C season. However, no AFA non-exempt vessels fished during the C season and the fishery was managed to the aggregate inshore limit.

Table 3.1a

2024 BSAI DIRECTED PCOD SIDEBOARD FISHERY*						
Coop	Coop Sideboard Percentage	Annual Sideboard Limits (mt)	Sideboard Limit Transfers (mt)	Final Sideboard Limits (mt)	Directed Catch (mt)	Unharvested Sideboard Limits (mt)
Akutan Catcher Vessel Assoc.						
Northern Victor Fleet Cooperative	<p><b>Due to PCTC Implementation in 2024 the C season is the only BSAI Cod Sideboard fishery. However, no AFA non-exempt vessels fished for BSAI Sideboards in 2024. Therefore, no 2024 BSAI directed P.cod sideboard data are available for Table 3.1a.</b></p>					
Unalaska Fleet Cooperative						
Unisea Fleet Cooperative						
Westward Fleet Cooperative						
Inshore Totals		3,971	0			

\* Due to PCTC Program implementation, the BSAI P.cod Sideboard was adjusted and only applies to the BSAI Cod Trawl C Season.

Table 3.1b. covers the GOA sideboard limits and each coops' non-exempt vessels' harvest in the directed GOA sideboard fisheries that had AFA catcher vessel participation. The table includes each participating coops' harvest, aggregated non-exempt AFA vessel harvest, total annual sideboard limit, and the remaining unharvested sideboard limit for each of the four fisheries. The table does not include the GOA sideboard harvest by Open Access vessels.

**Table 3.1b**

Source: Annual AFA Coop Reports and NMFS

<b>2024 GOA DIRECTED SIDEBOARD HARVESTS AND LIMITS*</b>							
Fishery	Area	Coops with GOA Harvest	Season	Coop Harvest (mt)	Total AFA Non-Exempt Harvest (mt)	2024 Total AFA CV Sideboard Limit (mt)	Over / (Under) Sideboard Limit (mt)
Pollock	610	Northern Victor	B	903.8	904	2,216	(1,312)
Pollock	620	Northern Victor	B	333.4	333	5,820	(5,487)
Pollock	630	Northern Victor	B	772.6	773	4,063	(3,290)

\*Does not include GOA sideboard catch by Open Access vessels.

## 3.2 PSC Catch

Tables 3.2a, 3.2b, 3.2c, and 3.2d cover prohibited species bycatch amounts taken by AFA catcher vessels participating in BSAI and GOA groundfish fisheries.

\*\* PSC catch from Open Access pollock fishing not included

## **Appendix I**

2024 AFA Catcher Vessel

Intercooperative Agreement

## 2024 INTERCOOPERATIVE AGREEMENT

This 2024 INTERCOOPERATIVE AGREEMENT is entered into by and among HIGH SEAS CATCHERS COOPERATIVE (“High Seas”), MOTHERSHIP FLEET COOPERATIVE (“MFC”) and the “Inshore Coops”, i.e., AKUTAN CATCHER VESSEL ASSOCIATION, NORTHERN VICTOR FLEET COOPERATIVE, UNALASKA FLEET COOPERATIVE, UNISEA FLEET COOPERATIVE and WESTWARD FLEET COOPERATIVE, all of which are Washington Fish Marketing Act corporations, as of \_\_\_\_\_, 2023, with respect to the following facts:

A. High Seas, MFC, and the Inshore Coops (together, the “Coops”) are composed of the catcher vessels (the “Vessels”) eligible to harvest Bering Sea and Aleutian Islands (“BS/AI”) pollock under the American Fisheries Act (the “AFA”). High Seas and the MFC are composed of all of the catcher vessels eligible to harvest BS/AI pollock in the “catcher/processor” and “mothership” sectors of such fisheries, respectively.

B. Under regulations implementing the AFA, the Vessels are subject to collective limits on the amount of certain groundfish species other than BS/AI pollock they may harvest (the “Sideboards”). The Sideboards are catch limits, not catch allocations. However, to promote effective Sideboard management, Coops have allocated the Sideboards among their members, and members of each Coop have agreed that a member that over-harvests its Sideboard allocation will be subject liquidated damages. The Coops have also agreed that Sideboard allocations may be transferred among Coops and Coop members, and that such transfers may cure an overharvest breach.

C. Under AFA regulations, some Vessels are exempt from some Sideboards, and some exemptions from Sideboard limits are conditional. The Coops have adopted procedures that give effect to the Sideboard exemptions and the conditions on which they are granted.

D. Under the AFA, the Vessels are also subject to collective limits on the incidental catch of halibut and Bering Sea crab (the “AFA PSC Sideboards”). The Coops acknowledge that the AFA PSC Sideboards for halibut and crab are catch limits, not catch allocations. However, to promote effective AFA PSC Sideboard management, the Coops have allocated AFA PSC Sideboards among their members and/or among the fisheries in which the Vessels participate and have adopted restrictions on the usage and transfer of those allocations.

E. The Coops acknowledge that their participation in BS/AI trawl fisheries is constrained by the prohibited species catch allowances (the “PSC Allowances”) for the BS/AI trawl limited access sector (the “TLAS”) as set by the National Marine Fisheries Service (“NMFS”) in connection with the annual harvest specifications for BS/AI groundfish, and that when a PSC Allowance is attained, the Vessels are required to cease fishing in the affected fishery or area, even if the related AFA PSC Sideboard has not been attained.

F. The Pacific Cod Trawl Cooperative (“PCTC”) Program takes effect as of the 2024 fishing year. The PCTC Program allocates a certain amount of BS/AI Pacific cod for harvest among eligible License Limitation Program (LLP) licenses, on the condition that the LLP license holder joins a PCTC Program cooperative. The PCTC Program removes the AFA BS/AI Pacific cod Sideboard for the annual “A” and “B” seasons but imposes an AFA BS/AI Pacific cod Sideboard for the annual “C” season.

G. The PCTC Program establishes separate halibut and crab PSC limits for the BS/AI Pacific cod trawl catcher vessel (CV) sector (the “Cod Fishery PSC Limits”), establishes separate Pacific cod “C” season halibut and crab PSC apportionments, and removes the AFA halibut PSC Sideboard for the Vessels. However, the AFA crab PSC Sideboards remain in effect, and halibut bycatch in the BS/AI pollock fishery continues to be limited by its annual TLAS halibut PSC Allowance.

H. In the interest of maintaining a meaningful halibut and crab bycatch control program, the Coops are allocating their proportionate shares of the Cod Fishery halibut PSC Limit, the Cod Fishery crab PSC Limit and the AFA crab PSC Sideboard among their members. Because the Vessels are subject to both the Cod Fishery crab PSC Limit and the AFA crab PSC Sideboard, the Coops will allocate and manage their crab bycatch to maintain compliance with the lower of those limits.

I. The Coops are subject to certain time and area limits on their harvest of BS pollock in connection with Steller sea lion protection measures (the “RPAs”). The Coops have agreed to manage their members’ fishing activity to promote compliance with the RPAs, while preserving certain Vessels’ access to the sea lion conservation area (“SCA”).

J. The North Pacific Fishery Management Council (“Council”) has adopted a “trigger amount” of herring (the “Trigger Amount”), which, if attained, causes certain “savings areas” to be closed to trawling for pollock for certain periods of time. Each Coop’s members have agreed to exercise their best efforts to conduct their fishing efforts such that the Coops operate within the Trigger Amount, and to comply with the related management measures.

Now, therefore, the parties agree as follows:

1. Sideboard Limits. The Coops will limit the Vessels’ aggregate annual harvest of each Sideboard species (which, for purposes of this Agreement, will include the BS/AI “C” season allocation of Pacific cod) to the amounts set by NMFS in accordance with 50 C.F.R. § 679.64(b), and as adjusted in accordance with this Agreement. To give effect to this provision, each Coop will (i) limit its non-exempt members’ Vessels’ aggregate annual harvest of each Sideboard species to the amount that such Vessels contribute to the aggregate annual Sideboard for such species, as adjusted in accordance with this Agreement; or (ii) in the case of two or more Coops entering into an intercooperative agreement under which the parties have agreed to limit their collective non-exempt members’ Vessels’ aggregate annual harvest of one

or more Sideboard species to the amount that such Coops' members' Vessels' collective catch histories contribute to the annual Sideboard for such species, limit its members catch in compliance with such intercooperative agreement, subject to adjustments made in accordance with this Agreement.

2. Sideboard Management. The Coops acknowledge and agree that coordinated Sideboard management is essential to ensure compliance with the aggregate Sideboard limits. Therefore, the Coops will follow the procedures set forth in this Section 2. For purposes of this Section, Coop catch data produced by the Monitoring Agent (as identified in Section 8, below) in conformance with NMFS catch accounting and bycatch estimation procedures will be presumed accurate. Vessels having made an observed trip may expedite the accounting of that trip's tow-by-tow data by directly submitting copies of the following NMFS forms, as filled out by the Observer, to the Monitoring Agent: Vessel Haul Form, Observer Haul Form, and Species Composition Form.

a. Sideboard Allocation. The Monitoring Agent, in consultation with NMFS, will annually allocate all Sideboards for which NMFS opens a directed fishery in which non-exempt members' Vessels are eligible to participate by first reserving an amount of each such Sideboard species necessary to fund the bycatch needs of pollock and other directed groundfish fisheries in which the AFA catcher vessels participate, and then allocating the remaining BS, AI and Gulf of Alaska ("GOA") non-exempt vessel Sideboard directed fishery allowances for each species among the Coops pro rata, according to the ratio of their overall limits as set forth in Section 1, above. The allocations will be based on NMFS data and formulas to the extent feasible, and on the best available data otherwise. Each Coop will exercise its best efforts to provide the Monitoring Agent with all catch data that the Monitoring Agent reasonably requests for purposes of calculating such allocations.

b. Sideboard Transfers. A Coop may transfer some or all of its Sideboard allocations to one or more other Coops on such terms as they may agree, provided that no such transfer will take effect unless and until it is approved by the Intercoop Manager (as identified in Section 10, below).

c. PSC Limit Allocation and Use. The Monitoring Agent will allocate the Halibut Mortality Allowances and the Crab PSC Allowances for fisheries other than the BS/AI Pacific cod fishery (if any) pro rata among the Coops according to the allocations of the related Sideboard species fisheries made under Section 2.a., above. The Monitoring Agent will allocate the "C" season apportionment of the Cod Fishery halibut PSC Limit, the "C" season apportionment of the Cod Fishery crab PSC Limit apportionment and a "C" Season apportionment of the AFA crab PSC Sideboard Limit in accordance with Section 3, below. Other than as specifically provided in this Agreement, each Coop will exercise its best efforts to manage its Vessels such that the Vessels' aggregate incidental catch of halibut and crab (as determined by the Monitoring Agent in accordance with NMFS procedures) does not cause the Coops to exceed the related PSC Limits. Each Coop agrees to release to the Monitoring Agent

on a timely basis for redistribution at no cost any PSC allocated or apportioned to it that it determines is not necessary to harvest its Sideboard allocations.

d. Gulf of Alaska Groundfish Sideboards.

(i) The Coops acknowledge that the Council has stipulated that no Vessel exempt from the GOA groundfish Sideboards may lease any portion of such Vessel's BS or AI pollock allocations to another person or Vessel during a year when such exempt Vessel harvests fish in a GOA fishery other than the Central GOA Rockfish Program fishery.

The Coops acknowledge that the Council's stipulation was intended to prevent a Vessel from using its ability to transfer or license the use of its Coop pollock allocation to increase its opportunity to harvest GOA groundfish in excess of applicable Sideboards. Therefore, the Coops will require that an exempt Vessel that actually exceeds an otherwise applicable Gulf groundfish Sideboard in 2024 must not have transferred any amount of such Vessel's BS/AI pollock allocation for 2024 to another vessel such that the aggregate amount of such exempt Vessel's annual BS/AI pollock allocation is reduced by such transfer(s). If an exempt Vessel that exceeds a GOA groundfish Sideboard fails to comply with the BS/AI pollock transfer limitations of this Section, it will be deemed to have over-harvested its Sideboard allocation, notwithstanding its exempt status, and it will be subject to the related over-harvest penalties per the enforcement provisions of its Coop's Membership Agreement and this Agreement. For purposes of this provision, a Vessel's pollock allocations will be calculated net of the amount normally reserved for harvest by a Coop "sweep-up" Vessel for purposes of season and/or area harvest limit compliance.

3. BS/AI Cod "C" Season Fishery Management Measures.

a. Halibut and Crab Allocations. As of \_\_\_\_\_, [date], the Monitoring Agent will allocate the "C" season apportionment of the Cod Fishery halibut PSC Limit and the lesser of the "C" season apportionment of the Cod Fishery crab PSC Limit or remaining AFA crab PSC Sideboard amount, as the same are revised from time to time, among the Coops pro rata according to the ratio of their Pacific cod "C" season Sideboard contribution as calculated under Section 1., above. Subject to the foregoing, the Monitoring Agent will allocate transferable halibut and crab bycatch limits to each Coop's exempt and non-exempt Vessels as follows:

(i) each Coop's initial halibut and crab allocations will be reduced by five percent (5%) to fund the "traditional time and area" buffer (the "Buffer") provided to the exempt Vessels pursuant to (ii), below; and

(ii) each Coop will receive separate halibut and crab PSC allocations for each of its Vessels operating on an exempt basis, proportionate to such Vessels' contribution to the related NMFS reserve, provided that each Coop's initial "1700 mt" exempt vessel BS/AI halibut and crab allocations will be adjusted upward by a pro rata amount of the

Buffer. In cases where an exempt Vessel contributes less than 500 metric tons (“mt”) to the BS/AI cod exempt vessel reserve, the initial allocation of halibut and crab relative to that Vessel will be based on a presumed contribution of 500 mt.

b. BS/AI Halibut and Crab Reallocation. The Monitoring Agent will track the aggregate BS/AI Pacific cod “C” season Sideboard fishery catch and the halibut and crab bycatch of each Coop’s exempt Vessels.

Upon the Monitoring Agent determining that a Coop’s exempt Vessels (as a group) have harvested their initial or subsequent allocation(s) of the “C” season Pacific cod Sideboard without exceeding the Coop’s related allocation of exempt Vessel halibut and crab (as adjusted by intra or inter Coop transfers) (such Coop being a “Complying Coop”), the Monitoring Agent will reduce each Coop’s (including the Complying Coop’s) remaining allocation of non-exempt Vessel halibut and crab for the Pacific cod fishery (if any) pro rata, according to the proportion of its initial non-exempt allocation of such halibut and crab vis-a-vis the other Coops, such that the sum of the reductions is the lesser of (i) the amount of halibut and crab necessary for each exempt Vessel in the Complying Coop to harvest an additional 300 mt of Pacific cod at the pre-Buffer non-exempt cod/halibut and cod/crab ratios, or (ii) the proportionate amounts of such halibut and crab that the Monitoring Agent deems necessary for the Complying Coop’s exempt Vessels to operate at such ratio until the Pacific cod fishery is closed to catcher vessel trawling; provided that the sum of such reductions under (i) or (ii) above will in no case exceed that amount of halibut or crab calculated to harvest 1500 mt at the pre-Buffer non-exempt cod/halibut and cod/crab ratios. The Monitoring Agent will then increase the relevant Coop’s exempt Vessel cod-related halibut and crab allocations for such fishery by the sum of such reductions.

On the other hand, if a Coop’s exempt Vessels harvest their initial or subsequent cod-related halibut or crab allocation for the BS/AI Pacific cod fishery (as adjusted by inter or intra Coop transfers) before having harvested the Coop’s “C” season Pacific cod Sideboard allocations made available therewith, the Monitoring Agent will not increase such Coop’s exempt Vessel allocations, and such Coop will require such Vessels to cease their directed fishing in that cod fishery, notwithstanding their exemption.

If the Monitoring Agent determines that a halibut or crab reallocation under this Section has provided a Coop with halibut or crab in excess of the amount necessary to fish until fishery closure, the Monitoring Agent will have the authority to release an amount of the surplus that the Monitoring Agent deems reasonable back to the contributing Coops.

c. Better Practices Protocols. Coop member Vessels participating in the “C” season Pacific cod trawl limited access fishery are required to adhere to the following better fishing practice protocols. (The following protocols do not apply in connection with trawl cod operations conducted in the Aleutian Islands fishery management area or sub-areas.)

(i) Halibut Excluder. Each Coop member Vessel will use a halibut excluder bycatch reduction device (BRD) on every cod trawl tow. The halibut BRD used must, at a minimum, be constructed and installed in a manner similar to halibut BRD devices that are generally recognized by Coop members as effective for reducing halibut bycatch. However, this provision is not intended to prohibit or restrict the development and implementation of new halibut BRDs, provided that there is a reasonable expectation of increased halibut bycatch reduction through their use. Notwithstanding the foregoing, Coop member Vessels that are in compliance with this protocol as of the beginning of a cod fishery season, and who subsequently suffer irreparable damage to their BRD, will be relieved of their obligation to comply with this protocol on the condition that they notify their Coop's Board of Directors as of the next delivery following such damage that they are claiming this exemption.

(ii) No Night Fishing. Coop member Vessels will not fish for cod during the period of the night beginning two (2) hours after sunset and ending two (2) hours prior to sunrise. "Not fishing" is defined as having trawl doors aboard the Vessel. Sunset and sunrise times will be determined with reference to the U.S. Naval Observatory website, and calculated using Akutan, Alaska as the reference location. A table showing the 2024 sunset and sunrise times for Akutan, Alaska is attached as Exhibit A.

(iii) Minimum Codend Mesh Size. For the 2024 season, the Coops will require that their member Vessels use codends in the BS cod fishery constructed of mesh no smaller than 7 inches, as determined by between-knot measure. Notwithstanding the foregoing, Coop member Vessels that are in compliance with this protocol as of the beginning of a cod fishery season, and who subsequently suffer irreparable damage to their fishing gear, will be relieved of their obligation to comply with this protocol on the condition that they notify their Coop's Board of Directors as of the next delivery following such gear damage that they are claiming this exemption.

d. Enforcement of Better Practices Protocols and Damages for Breach. Each Coop's Board of Directors will have exclusive authority to determine whether its member Vessels are operating in compliance with the protocols established under Section 3.c., above. In the event that a Coop Board of Directors determines that one of its member Vessels has failed to comply with one or more of the protocols set forth above, the Board of Directors may assess liquidated damages in an amount not to exceed Five Thousand Dollars (\$5,000.00) for each violation. Such liquidated damages will be the sole and exclusive remedy for a breach of Section 3.c., and the Coops hereby waive, on behalf of themselves and their members, all claims to any other type of damages for a breach of Section 3.c., including but not limited to actual, consequential, or punitive damages.

#### 4. Over-harvest Prevention Measures.

a. Harvest Limits. The Coops will exercise their best efforts to prevent any of their members from exceeding their pollock allocation and Sideboard limits. In cases where a member has done so, the Coops will exercise their best efforts to prevent such over-

harvest from affecting non-members and/or resulting in a violation of fishery regulations. To that end, the Coops will facilitate pollock allocation and Sideboard limit transfers among members when practicable, agree to transfer PSC Limit or PSC Allowance apportionments among Coops when practicable, and to issue “stop fishing” orders as appropriate when such transfers are not practicable. The Coops also agree to encourage their members to mitigate the effects of inadvertent over-harvests by making directed fishing and PSC Limit and PSC Allowance allocations available to other Coop members on reasonable terms and conditions. However, other than as provided in Section 4.f.(ii), below, nothing in this Section 4 will constitute an affirmative obligation on the part of any Coop or its members to transfer an allocation at the request of another Coop or other members.

b. Pollock Allocation and Sideboard Penalties. The Coops acknowledge that notwithstanding the provisions of Section 4.a, above, adopting and enforcing appropriate penalties is necessary to create over-harvest disincentives. Each of the Inshore Coops will therefore adopt the uniform penalty for an Inshore Coop member exceeding its BS, AI or Gulf pollock directed fishing allocation amount or area or season proportion of one hundred fifty percent (150%) of the total ex-vessel value of such over-harvest. For purposes of this Subsection 4.b and Subsection 4.c, below, provision, ex-vessel value will be deemed to be the ex-vessel price paid by the processor(s) to which the over-harvesting member delivered for the over-harvested species during the season(s) in which the over-harvest takes place, and will include all consideration paid for the over-harvested allocation, including but not limited to all bonuses and post season adjustments. The Coops each agree to adopt the uniform penalty amount of One Thousand Dollars (\$1,000.00) per metric ton for over-harvests in the BS, AI and GOA Pacific cod Sideboard fisheries, and the amount of Three Hundred Dollars (\$300.00) per metric ton for over-harvests in all other BS, AI and GOA directed groundfish fisheries. Over-harvests will be determined on the basis of the best available data. Harvest reports developed by the Monitoring Agent will be presumed accurate in the absence of demonstrable error.

c. PSC Allocation Enforcement. Upon a Coop receiving written notice from the Monitoring Agent that it does not have an adequate PSC Limit, Halibut Allowance or Crab Allowance allocation to support further fishing activity by its members’ vessels, such Coop will immediately cause its members’ vessels to cease fishing in the relevant directed fisheries. The Coops hereby adopt as a uniform penalty for each landing following such notice that includes a PSC species harvested in excess of a Coop’s PSC Limit or Allowance allocation an amount equal to twice the ex-vessel value of all commercially harvestable species delivered in such landing. For purposes of this Subsection, Coop catch data produced by the Monitoring Agent in conformance with NMFS catch accounting and bycatch estimation procedures will be presumed accurate. The Coops will take all actions and execute all documents reasonably necessary to give effect to this provision.

d. Liquidated Damages. The Coops acknowledge that the financial impact associated with over-harvesting an allocation or exceeding a Sideboard limit, PSC Limit, Halibut Allowance or Crab Allowance are difficult to estimate, and that penalty amounts

are therefore intended to be a substitute in all cases for direct, indirect and consequential damages. Therefore, the Coops agree that the penalty amounts established under 4.b. and 4.c., above are liquidated damages, the payment of which (together with reasonable costs of collection) will satisfy a member's obligation with respect to any harvest in excess of a Sideboard, PSC Limit, Halibut Allowance or Crab Allowance allocation. The Coops hereby waive any and all claims to direct, indirect or consequential damages related to such over-harvest.

e. Rights of Action. Each Coop agrees that the members of all other Coops will have rights to initiate penalty actions and to be paid overharvest forfeitures and related costs of collection equivalent to such Coop's own members' rights. Each Coop will take all corporate action necessary to give effect to this provision.

f. Indemnification.

(i) Each Coop (an "Indemnifying Coop") will indemnify, defend and hold harmless all other Coops and their members (the "Indemnitees") against all third party claims, legal actions and proceedings of any type whatsoever (the "Actions"), and against all third party damages, including but not limited to all liabilities, obligations, judgments, penalties, fines, forfeitures, costs of defense and reasonable attorneys' fees (including fees incurred enforcing this indemnification) (together, the "Damages") that the Indemnitees incur as a result of an overharvest of a pollock, Sideboard, PSC Limit, Halibut Allowance or Crab Allowance allocation by a member of the Indemnifying Coop.

(ii) For purposes of this provision, in cases where an over-harvest by a member is (a) not willful or repeated; (b) is capable of being corrected by other members (of the same or other Coops) restraining their harvest(s), and timely written notice is provided to such members' Coop(s); and (c) for which the appropriate amount of liquidated damages is tendered by the originally over-harvesting member to a qualified third party escrow agent in readily available funds, the obligation of indemnification for third party claims related to the original over-harvest will shift to the Coop(s) receiving notice and the tender of liquidated damages.

6. Steller Sea Lion-Related Management Measures.

a. Non-Exempt Vessels. Other than as necessary to give effect to exemptions for which its members qualify, each Inshore Coop will limit the aggregate annual pollock harvest of its members per season and per area (as determined in accordance with NMFS accounting procedures related to such harvests) to the percentage of the annual inshore pollock directed fishing allowance generally permitted to be harvested during such season and/or in such area.

b. SCA Exemption for Vessels Equal to or Less than 99' in Overall Length. The Coops acknowledge that under the current Steller sea lion-related management

measures, vessels equal to or less than 99 feet in length are eligible to harvest all of their BS pollock A season allocations inside the SCA. So long as this exemption remains in effect, the Coops agree that the Monitoring Agent in consultation with NMFS will calculate and reserve from the Coops' aggregate pollock allocations an amount of quota inside the SCA adequate to fund the total seasonal directed harvest of all members' Vessels equal to or less than 99 feet (the "99' Reserve"). The Monitoring Agent will then allocate the 99' Reserve among the Coops pro rata, according to the relative catch histories of their Vessels under 99'. Each Coop will in turn allocate its share of the 99' Reserve among its members operating Vessels under 99' in length, prior to establishing the inside SCA allocations for its members' Vessels over 99' in length. The Coops agree to require that any license or transfer of pollock quota from a Vessel equal to or less than 99' to a Vessel over 99' will be subject to generally applicable regulations concerning spatial and temporal distribution of catch, including but not limited to proportions which may be harvested inside the SCA, notwithstanding the exemption extended to vessels less than or equal to 99'.

7. Herring Trigger Amount Management. The Coops will exercise all reasonable efforts to reduce their herring bycatch to the lowest commercially practical levels, and specifically agree to coordinate their members' fishing activities with the goal of achieving the lowest practicable bycatch rates. For purposes of this Section, Coop catch data produced by the Monitoring Agent (as identified in Section 8.a, below) in conformance with NMFS catch accounting and bycatch estimation procedures will be presumed accurate.

8. Data Reporting.

a. Appointment of Monitoring Agent. The Coops acknowledge that it will not be possible to obtain the benefits associated with cooperative harvesting activity unless catch data is reported on a timely basis to a centralized monitoring and reporting agent (the "Monitoring Agent"). The Coops will independently contract with Sea State, Inc. as their agent for that purpose.

b. Data Gathering. Each Coop will take all commercially reasonable actions to obtain catch data and other information that may be necessary for effective fishery management from its members as soon as reasonably possible, and to provide such data to the Monitoring Agent as soon as reasonably possible after receiving such data. Data produced for the Coops by the Monitoring Agent will be presumed accurate, which presumption will only be rebuttable upon clearly demonstrating inaccuracy.

c. Data Release. Each Coop will arrange to have each of their members' Vessels' bycatch data (to the fullest extent available, with tow-by-tow data being considered optimal) released directly from the NMFS Observer Program to the Monitoring Agent and the Intercoop Manager (as identified in Section 10, below). The Monitoring Agent and the Intercoop Manager are hereby authorized to release all such data in forms and to parties as they reasonably deem appropriate to promote bycatch reduction.

9. Vessel Pre-registration. The Coops acknowledge that it may be necessary for their members to provide advance notice of their intent to employ Vessels in certain fisheries, to provide NMFS and the Coops with the ability to project catch rates and amounts. Each Coop agrees to obtain such elections from its members and report them to the Monitoring Agent on a timely basis.

10. Intercooperative Management. The Coops acknowledge that resolving issues related to cooperative harvesting operations will be a continuing process. Each Coop agrees to appoint a person to represent it in intercooperative matters. The Coops further agree to retain United Catcher Boats (“UCB”) to provide ongoing intercooperative coordination services and an intercooperative manager (the “Intercoop Manager”) through December 31, 2024. The Coops agree such services will not include representing the Coops or any of them in political or general policy matters, other than as authorized by all Coops in advance. All Coops agree to provide a copy of their annual Coop Report as required under 50 CFR 679.61(f) to the Intercoop Manager not less than 15 days prior to the required NMFS submission date.

11. Term. This Agreement will take effect upon execution by all of the Coops. This Agreement will expire on November 30, 2024. The Coops will meet in good faith negotiations concerning modification of this Agreement and extension of its term not later than October 1, 2024, with the express intent of replacing or extending this Agreement prior to November 30, 2024.

12. Miscellaneous.

a. No amendment to this Agreement will be effective against a party hereto unless in writing and duly executed by such party. The parties agree to amend this Agreement as reasonably necessary to comply with changes in law, and policies and regulations implementing the AFA.

b. This Agreement will be governed by and construed in accordance with applicable federal law and the laws of the State of Washington.

c. This Agreement may be executed in counterparts which, when taken together, will have the same effect as a fully executed original. Delivery of a signed copy of this Agreement by telefacsimile will have the same effect as delivering a signed original.

d. The parties will execute any documents necessary or convenient to give effect to intents and purposes of this Agreement.

e. All notices required to be given under this Agreement will be deemed given five (5) days following deposit in certified first class U.S. mail, postage prepaid, with the correct address, or upon the first business day following confirmed telefacsimile transmission to the recipient. Each Coop agrees to provide the name, postal address,

telefacsimile number and e-mail address (if any) of its representative for purposes of receiving notices under this Agreement within three (3) days of executing this Agreement.

f. In the event that any provision of this Agreement is held to be invalid or unenforceable, such provision will be deemed to be severed from this Agreement, and such holding will not affect in any respect whatsoever the validity of the remainder of this Agreement.

g. Each Coop agrees to use its best efforts to resolve any disputes arising under this Agreement through direct negotiations. Other than disputes related to overharvest of pollock, Sideboard limits or PSC Limit or PSC Allowance apportionments in connection with which one or more Coops or their members seek an injunction, a restraining order or some other form of equitable relief, all disputes not resolved through direct negotiation and/or dispute resolution will be submitted to arbitration in Seattle, Washington upon the request of any party to this Agreement. The party's written request will include the name of the arbitrator selected by the party requesting arbitration. The other party will have ten (10) days to provide written notice of the name of the arbitrator it has selected, if any. If the other party timely selects a second arbitrator, the two arbitrators will select a third arbitrator within ten (10) days. If the other party does not timely select the second arbitrator, there will be only one arbitrator. The single arbitrator or the three (3) arbitrators so selected will schedule the arbitration hearing as soon as possible thereafter. Every arbitrator, however chosen, must have no material ties to any Coop or Coop member. The decision of the arbitrator (or in the case of a three (3) arbitrator panel, the decision of the majority) will be final and binding. The arbitration will be conducted under the rules of (but not by) the American Arbitration Association. The parties will be entitled to limited discovery as determined by the arbitrator(s) in its or their sole discretion. The arbitrator(s) will also determine the "prevailing party" and that party will be entitled to its reasonable costs, fees and expenses, including attorneys' and arbitrator fees, incurred in the action by said party. In no event will arbitration be available pursuant to this paragraph after the date when commencement of such legal or equitable proceedings based on such claim, dispute, or other matter in question would be barred by the applicable statute of limitations.
